

EDAnalyzer

EDAnalyzer

ProtonTruthStudies

```
graph BT; PT[ProtonTruthStudies] --> EA1[EDAnalyzer]; PT --> EA2[EDAnalyzer];
```

The diagram illustrates a data flow from a single source to two separate processing units. At the bottom center is a rectangular box labeled "ProtonTruthStudies". From the top center of this box, a vertical line extends upwards. This line then branches into two horizontal lines, each ending in an arrowhead pointing towards the bottom center of one of the two "EDAnalyzer" boxes positioned above. The "EDAnalyzer" boxes are identical in size and style, with the text centered within each. The entire diagram is rendered in black lines and text on a white background.
